

Interns for GXN - Copenhagen

This is an application to join our team as an intern for a semester in Copenhagen.

We are GXN

GXN is an independent design-driven research studio that pioneers strategic sustainability within the construction industry. Founded by 3XN, we believe in a sustainable future that integrates circular and behavioural design. Through our projects, we bridge research and practice, exploring architecture's unique potential for effecting positive change. We are considered as one of the leading built environment organisations with sustainable agendas. We work across a rich range of scales, typologies, formats and locations – it is our approach that unites our work. Our vision is to positively affect the world we live in — architecturally and environmentally.

Read more about who we are, and explore our work here: [What exactly does gxn do? inside 3xn's design-driven research studio | 3XN](#)

The Internship

Experience working in our core team and contributing directly to the development of our projects, in a rich range in scales, typologies, formats and locations. The duration of the internship is generally 6 months between August/ September and January/February, in Copenhagen, Denmark. Several elements make our office and our work unique. You will work with architects, behavioural designers, circular design specialists, engineers and even an anthropologist. You will be working with a range of exciting tools and processes, from material innovation to masterplans, from forensic material studies to co-design workshops, which will develop unique and valuable skills.

Your Qualifications

- a student still enrolled in a university,
- that has completed at least 2,5 years of relevant studies (architecture, engineering, urban design, etc.),
- confident using Rhino and Adobe,
- fluent in English (Scandinavian languages are an advantage)
- a passionate team player,
- with an interest or experience in behavioural design and/or circular design.

If you have any questions to this position you can contact Aleksander Guldager Kongshaug on agk@3xn.dk
